WHAT MAKES BB GLOW SO POPULAR

To quickly sum it up the BB Glow is the latest cosmetic trend originating from South Korea and Singapore where a flawless skin is a number one beauty must. Put it simply, it is a semi-permanent skin foundation which substitutes the need of using foundation creams on an everyday basis. The BB serum, containing anti-aging ingredients, antioxidants, and vitamins, is safely applied into the uppermost layer of the skin by a special Derma Pen using a Nano needling technology, making the skin looks naturally better immediately and for a long time. Here are some of the benefits of BB Glow treatment:

- Evens out blemishes, discoloration, and hyperpigmentation
- Decreases enlarged or clogged pores and blackheads
- Adds vitamins, anti-aging ingredients, and antioxidants
- Stimulates natural collagen production and pigment glow
- Creates delicate foundation effect
- Covers up facial skin flaws
- Smooths and moisturises
- Immediate and long-lasting
- Does not clog pores like any foundation products
